Teller - Germany

STUDENT

The stamp "Teller Germany" refers to the "student" quality, which are bridges for beginner and student-level instruments.

These bridges are made of our Bosnian maple after they naturally seasoned over a period of at least five years in our lumberyard here in Bubenreuth.

We give up to three stars to the bridges according to their quality – one star for the basic beginner's model and three stars for the best student-model.

Josef Teller 1891 - Germany

MASTER

The stamp "Josef Teller 1891 Germany" indicates the "Master" quality, which are bridges for concert and soloist instruments.

The maple wood of these bridges has a very fine grain and strong medullary rays. We store them for a period of at least 10 years without using any artificial drying techniques.

We give up to three stars for this level of quality according to the density of their annual rings and the beauty of their medullary rays.

Teller Royal de luxe

There are only a few special bridges that qualify to receive this stamp.

Please understand that we can only produce a limited number of bridges of this quality.
